

FlexPrint M

In-Line, Servo, Flexographic Printer

The **ALL NEW ,ALL SERVO, FlexPrint M** minimizes setup time by storing print and registration parameters in storable recipes accessible via its intuitive touch screen user interface. The ink level monitoring system provides reliable hands off operation. A scalable control system and optional web based HMI support integration and remote operation. The FlexPrint M provides unequalled functionality, while maintaining high-resolution, single color printing on Tyvek®, paper and all poly films.

Like other models in the FlexPrint line, the FlexPrint M is available with up to 600mm width and can print up to 50 cycles per minute. Other features of the FlexPrint M, include odorless ammonia free inks, a self-contained inking system for simplified operation, and a Teflon® coated ink tray for fast, easy ink changeover.
