11.5" x 11.5" - 200 lbs.
- **Fast and Accurate print capability**
up to 50 cycles per minute with true servo technology
- **User friendly design for easy operation**
odorless ammonia free inks with self contained inking system and a Teflon® coated ink tray

Medical Device & Pharmaceutical Package Printing

The FlexPrint mini is the smallest in-line Flexographic Printing System to provide high resolution single color printing on Tyvek®, paper and all poly films.

The new FlexPrint mini is designed to operate just like our other FlexPrint models, only it is about half the size. That means more room for your operators...more room for your robotic loading equipment...more room for other accessories on your packaging line. Actually, it gives you more room for whatever you choose to do with it!

SPECIFICATIONS:

Size: 11.5" x 11.5" (292mm x 292mm)
