

# C6 Carton Coder

The Bell-Mark C6 Carton Coder is designed to work in conjunction with all models of carton sealing equipment, including Loveshaw, 3M, Socco, Durable, Customized Equipment, Mateer Burt, Best Pack, ABC, Elliot and Standard Knapp.

It also incorporates a revolutionary new concept for in-line carton coding - Bell-Mark's patented pre-inked, Cartridge Ink System. The 160-2 cartridge is designed for instant loading and re-loading, and provides up to 300,000 no fade, high quality impressions per cartridge.

The C6 Series Carton Coders utilize a split frame design which allows for the same unit to be used not only for left and right hand mounting, but for top and bottom mounting as well. This feature, not found on any other carton coder, offers unlimited mounting versatility.

Another unique feature is the coder's ability to use either Porelon or Bell-Marker Sleeves when necessary. For these applications, where space is limited, this no cost option is ideal.

Bell-Mark Carton Coders feature heavy duty rib-backed sorts and logos for long lasting, quality impressions. Messages are quick and easy to change and are ideally suited for one line or multi-line messages.

## Pre-Inked Cartridge Ink System

The Bell-Mark Pre-Inked Cartridge Ink System allows use on non-absorbent boxes or webs. No other large character contact coder has this feature.

Available in several colors, the 160-2 cartridges provide perfect, error-free printing on every box or carton.
